While inventory systems can differ depending on unique requirements of the industry — for example, food distributors require expiration date tracking in order to ensure the product is delivered while it's still good. Aside from considering those specialized features, ERP-integrated inventory systems may include the following features:

3. Prepare an inventory of supplies to determine items that need to be replenished. Notify appropriate persons of items that need to be ordered. 4. Attend trainings and meetings, as requested by supervisor. 5. Provide break coverage to other MA's, as directed. 6. Actively participate in internal quality improvement teams and work with
