Inquiry Labs in the High School Classroom Research Paper Rationale When we both began this journey to education we assumed that it would be easy to find materials to teach high school science... and it was. We were naïve to believe that the lessons found would be inquiry-based and purposeful in light of the Ohio Science Standards.

What Is Mathematical Biology? If the unit of physics is an atom, then the unit of life is a cell; but a cell is infinitely more complex. A cell in mammals typically contains 300 million molecules. Some are very large, such as the DNA molecules, which consist of many millions of atoms. But a cell is not just a huge collection of molecules.
